

Trading Operations Analyst

Location: Dubai

Description

Our trading operations analysts are algorithmic thinkers that thoroughly understand today's electronic markets. Analysts are part of the critical team which is responsible for the operation, improvement, and ongoing implementation of our automated trading strategies. As part of this role, Analysts work closely with senior traders to monitor risk, reconcile positions, interact with trading counterparties, and verify trading activity.

Job Qualifications

Excellent test scores and high academic marks are required.

Proficiency in Excel and VBA is a plus.

Excellent problem-solving skills are required. Strong mathematical aptitude is required.

Some programming experience is a plus.

We are looking for bright analytical minds, with a focus on quantitative reasoning.

However, candidates from hard science programs are most common (i.e. Math, Engineering, Physics, Computer Science, etc.)
